

# Clinell True Type IP68 Rated Keyboard

SKU: CKTT1

Clinell True Type Keyboards, available from Keyboard Specialists (KBS), have been developed to simplify the cleaning process of computer equipment.

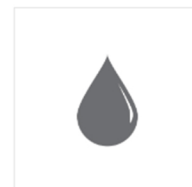

Suiting all cleaning protocols in a hospital and being able to withstand medical grade disinfectants, the Clinell keyboards have been manufactured from antimicrobial plastic for further protection when using the keyboard.

These medical keyboards are cost effective to be used in NHS hospitals, dental practices and veterinary surgeries, withstanding regular disinfection, including chlorine, meeting highest IP68 standards.

This keyboard features Plug & Play USB connection, compatible with Windows, Mac OS X and iOS computers.
