

CHERRY HC 2.2

Comfort and sound quality – the ideal combination for long gaming sessions

Models may vary from the image shown

The CHERRY HC 2.2 gaming headset – the ideal blend of wearing comfort and sound quality for extra-long gaming sessions.

With its perfect fit and excellent sound, you can use it for almost any application. Whether you're using it with a PC or other USB-connected device, it's ideal for hours of gaming while simultaneously listening and speaking, conference calls, or just listening to music.

The integrated USB sound card and 50 mm driver bring a wide sound spectrum with emphasized deep bass and fine treble with incredibly clear sound reproduction. The virtual 7.1 surround sound allows you to locate your gaming opponent without delay.

The ear-shaped ear cushions also provide pleasant sound immersion. If they get dirty, you can easily replace them. They're made of soft PU leather and fit just as comfortably as the adjustable headband with silicone air cushions in the upper head area. The tactile volume and mute controls are located directly on the headphones for quick and easy access.

The sensitive microphone is attached to the headset via a 3.5 mm AUX connector and can be easily

removed. The integrated LED shows you the mute status at a glance. If required, the supplied microphone windshield can be used to reduce the sound of breathing.

LED, raised tactile elements and the elegant monochrome-red illumination of the CHERRY logo make it easy for you to use the headset even in the dark.

The headset is foldable so you can take it with you wherever you need it.

If used via USB on a Windows PC, a wide range of features are available from the CHERRY Utility Software / Audio Center. You can integrate the Audio Center perfectly into your Cherry Assistant and make adjustments to the sound while gaming, for example. You can adjust the sound, set the microphone volume or activate surround presets in the Audio Center.

High-quality materials and minimalist design round off the overall package.

Matching products can be found in the CHERRY 2 series, such as the MX 2.0S mechanical gaming keyboard, which won the German Design Award.

HIGHLIGHTS

- Gaming headset with integrated USB sound card and impressive virtual 7.1 surround sound
- 50 mm drivers for a wide sound spectrum and crystal clear sound reproduction – ideal for simultaneous gaming and speaking
- Perfect fit thanks to the adjustable headband and silicone air cushions in the upper head area
- Replaceable ear cushions made of soft PU leather for a high level of comfort and pleasant sound immersion in an ergonomic shape for the ear
- Easy to access, tactile volume and mute controls directly on the headset
- Sensitive, detachable microphone (incl. windshield) with LED indicator for mute status and 3.5 mm AUX connector

- CHERRY logo in monochrome red LED illumination
- Foldable for easy transport
- Recommended for PC gaming but also other applications such as online conferencing or listening to music
- Support software included
- Minimized design, ideally suited to products from the CHERRY 2 series such as the MX 2.0S mechanical gaming keyboard
