

CHERRY MC 2.1

Wired RGB mouse with fantastic highlights

Models may vary from the image shown

The CHERRY MC 2.1 fits perfectly in your hand. As a gaming mouse for right-handed users, it focuses on ergonomics and performance. The extra flexible cable, reduced weight, and large mouse skates allow the mouse to glide easily over surfaces. The silicone inserts on the sides with a discreet surface structure ensures a particularly comfortable feeling in the hand. Two easily accessible, clearly shaped left side buttons are also freely programmable. The rubberized, translucent-rimmed mouse wheel, which is ribbed for a better grip, is wheel, button and eye-catcher all at the same time.

The transparent design of the mouse wheel makes full use of the entire color spectrum with 16.8 million colors (RGB) and various lighting effects. You can gradually adjust the precise 5,000 DPI Pixart sensor directly via the DPI switch on the mouse. The respective DPI level is displayed on the mouse as a red glowing color bar for a better overview. All settings can also be made easily via the CHERRY Utility software, which can be quickly called up by clicking on the CHERRY button. Additionally, the software allows you to freely program and store your individual user profiles. Each of the last settings are stored directly on the mouse, in the ONBOARD memory. This allows you to get right back into the game with your favorite light, button layout, and DPI rate. The USB 2.0 Full-Speed interface

supports up to 1,000 report rates for a game without delay.

If you are searching for a mouse that enhances performance and lets you play or work comfortably, the MC 2.1 is the mouse for you.

HIGHLIGHTS

- Precise 5,000 DPI Pixart sensor, adjustable via the DPI switch (+DPI status display) on the mouse or via the software
- USB 2.0 Full-Speed interface, supports up to 1,000 report rates
- CHERRY button for quick DPI adjustment and direct access to CHERRY Utility software to customize mouse settings
- Individual user profiles can be freely programmed in the software
- ONBOARD memory – the last, individual settings (light, DPI, key assignment) are stored directly on the mouse
- Two freely programmable, easy to reach side buttons (left)
- Full color spectrum with 16.8 million colors (RGB) and various lighting effects
- Rubberized translucent-rimmed mouse wheel which is ribbed for perfect grip and button function
- Right-handed mouse with reduced weight and ideal ergonomics for tireless gaming
- Feels good in the hand and provides secure grip due to integrated silicone inserts on the sides with a discreet surface structure
- Extra flexible cable
- Large glide pads
