

Goldtouch V2 Adjustable Comfort Keyboard -PC & Mac Compatible (USB)

Welcome to comfort 2.0. The Goldtouch V2 Adjustable Comfort Keyboard is the second generation of our premier computer keyboard. Our ergonomic keyboard was uniquely designed to adjust from 0-30° on the horizontal plane to properly straighten your wrists, and 0-30° of vertical tenting to help alleviate pressure on your tendons and align your arms and shoulders in a natural and comfortable position.

One of the best things about the Goldtouch V2 Adjustable Comfort Keyboard is that it uniquely adjusts to fit a wide range of body types, not just an average. That means everyone in your home or office can find their ideal comfort position within this one computer keyboard.

The Goldtouch V2 Adjustable Comfort Keyboard is PC Compatible, and easily connects to your desktop or laptop computer via USB port. The keyboard is easy to use plug and play technology, that doesn't require any additional software driver installation. The Goldtouch V2 Adjustable Comfort Keyboard also features 6 adjustable feet on the back of the keyboard to allow typists to make several adjustments. The most common adjustment is to raise the two front feet to get a negative slope whereby your wrists are positioned in a neutral or downward position rather than tilted upward. The other common adjustment is to raise all 6 feet, for those people using keyboard trays, to raise the device up an inch before making their dynamic ergonomic keyboard adjustments (this is especially helpful if your keyboard tray has a built in wrist rest).

Key features

- **Adjustability:** The Goldtouch ergonomic keyboard allows for 0°-30° adjustment in the horizontal plan, combined with 0°-30° adjustment of vertical tenting to help straighten your hands, wrists, shoulders and back.
- **Soft key touch,** low activation force and full key travel distance provides keying comfort and reduces risk from "bottoming out" when typing.
- **Compact size** allows for use in limited space environments, and reduces shoulder abduction when reaching for mice and other peripherals.
- **Ease of use and intuitive design** allow new users to adjust the keyboard to a comfortable typing position without additional accessories or attachments.

Specifications
