Or one PS/2 port on your host computer

KEYSONIC **KSK-3010ELC**

Super-Mini USB Keyboard with Backlight for Windows®

No restrictions

This super-mini keyboard is perfectly suited for use in limited spaces. With its 24 cm, it is just a little wider than a DIN A4 sheet of paper. And you don't even have to do without important key functions.

No compromises

The balanced backlighting allows you to write accurately even in low-light conditions. The X-Type membrane technology ensures a pleasant writing feel, and the clear, albeit compact, key layout prevents mistyping.

Silent typing

X-Type membrane technology provides ultra-quiet typing with a responsive and comfortable writing experience. Perfect for those who like to work without distraction and do not want to disturb their colleagues.
