One USB Type-A port on your host computer

Or one PS/2 port on your host computer

KEYSONIC **KSK-3210ELU**

Super-Mini USB Keyboard with Backlight for Windows®

Softly illuminated

The warm white backlighting of the keys is particularly pleasant on the eyes. This greatly improves typing in darkened rooms or in poor lighting conditions.

Space-saving

The keyboard in super-mini format combines all necessary functions with a functional design despite its compact construction. This makes it possible to work in the smallest of spaces. The USB-A connection cable is permanently connected and, with a length of 1.90 m, sufficiently flexible.

Touchpad included

The integrated touchpad is equipped with two buttons, both of which together completely replace a PC mouse. Right-click, left-click, scroll, all functions are available as usual, but unlike a mouse, they do not take up any extra space when working in confined spaces.

Logistical data

Packing unit: 30 pcs. / carton
Total weight: 15.6 kg / carton
Gross weight: (with packing): 0.485 kg / Article
Net weight: 0.370 kg
