

MCI 30 series

Designed specifically for heavy use applications, PrehKeyTec keyboards continue to perform long after others have failed. PrehKeyTec is so confident in the quality and durability of our German engineering, that a three year warranty is standard on every unit. Available in a compact row and column layout, the PrehKeyTec MCI 30 keyboard is well suited for Lottery, Payment Terminals, Grocery and Ticketing Applications.

Complex Applications

PrehKeyTec's programmability makes even the most complex application seem simple! Our unique design allows the user to program more than 100 keystrokes behind each key providing the operator the ability to drill down into an application with a single key stroke. This advanced programmability helps simplify operator training and enhances data input.

Aggressive Environments

Our robust keyboards are designed to withstand 'heavy fingers' and 30 million keystrokes, a metal base plate allows our keyboard to remain rigid in the most demanding environments.

Spills? Our keyboards are protected against spills and dust.

Ideal for high volume scanning operations where the keyboard is used primarily for tendering and PLUs. Use of double and quad keys makes this a very intuitive, uncluttered design for both new and experienced cashiers.

MCI 30 Technical Data

Features

- 30 programmable key positions (5 X 6 Keys)
- 7.193" L x 4.685" W (with integrated MSR)
- Self detecting interface: USB and PS/2 (with included adaptor)
- IP54 rating
- OPOS, JavaPOS and WEPOS drivers
- Windows®, Linux, DOS and Mac compatible
- PrehKeyTec WinProgrammer software
- 3 year warranty
- Colors: Black or White

Options

- Integrated bi-directional 3 track MSR
- Any color for 500 units or more
- Customized Logo
- Colored keys with wear resistant etched symbols
- Double and quadruple size keys

3 track MSR
